

Weser-Pro HY

Protects and embellishes

Fields of use

Weser-pro HY is a specially tested product for protection of Weser elements.

It reduces weathering, and growth of moss, lichen and plant micro-organisms, and makes further cleaning easier. It also brings out colours.

Weser-Pro HY can be used on new materials, and also for renovation, provided the surfaces have been cleaned of all efflorescence and traces of weathering. In the case of renovation, the materials look new and their colours are brightened up.

Instructions for use

The product is ready for use.

It must be used on dry materials.

- **On new materials**, apply one coat of Weser-Pro HY using a brush, a paintbrush or a sprayer.
- **For renovation**, make sure the materials are clean, and clean them beforehand, if necessary, with :
 - **Weser-Net EF** to remove efflorescence

Extra treatment

If cleaning operations prior to application of Weser-Pro HY are not carried out correctly, the results will not be satisfactory.

Make sure there are no traces of Weser-Net EF (an acid product) or other product left, by rinsing thoroughly with plenty of water. Leave to dry for at least 24 hours before applying Weser-Pro HY.

Packaging

5-litres plastic container.
Cardboard box of four containers.

Recommandations

Avoid applying too thick a coat of the product, and make sure its thickness is regular. Read carefully the instructions on the container.

- Do not swallow, and avoid contact with the eyes.
- Store in the original container, out of the reach of children, and away from foodstuffs.
- Do not apply Weser-Pro HY when it is raining, as the product is drained away by rainwater.
- Protect from frost. Store in a temperature of 5° to 35°C.
- Do not apply in temperatures of under 10°C.

Caracteristics

- Consumption: 5 litres for 30 to 50 sq. m. per coat.
5 litres for 10 m. of balustrade.

On paving, do not apply more than 5 litres for 30 sq.m., to avoid making the surface slippery

Equipment needed

- Sprayer, brush or wide paintbrush.
